

MOTIVATION

- ✘ The following is an attempt to present my take on prophecies mentioned in Quran, the Final Testament.
- ✘ This work is totally based on the work of Dr. Rashad Khalifa and his excellent translation of the Quran into the English language.
- ✘ You can find a copy of his translation on Amazon book library under this reference: “Quran The Final Testament, Authorized English Version”.
- ✘ The work of Rashad Khalifa’s effort resulted in calculating the year of Resurrection (2280 AD & 1710 AH, for the detail of his work see Appendix 25 of the book referenced above).

MOTIVATION

- ✖ This effort here started on 2015 as an extrapolation to the work of Rashad Khalifa and was intended to pinpoint the most probable days and hours of the prophetic events mentioned in the Quran.
- ✖ Everything that you see in this document is all based on my understanding of Dr. Rashad's work on this subject and my take on the Quran revelations about Prophecies mentioned in the book.
- ✖ This is an ongoing research on the prophecies subject according to the current available information and can be modified for the better in the future.

MOTIVATION

- ✖ This is a quest to inform and warn the current and future generations of human race of the upcoming prophecies including the day of Resurrection before that day come to pass without people being aware and ready for that day as Quran is reminding all the people in its revelations.
- ✖ It is recommended that you get acquainted with the Quran revelations via the Rashad's translation of the book and its appendices.
- ✖ Understanding that the Quran is intertwined with a mathematical structure based on the common denominator of number 19 (discovered in 1974 AD and referred to in chapter 74 verses 30 to 35).
- ✖ The above discovery has been verified in numerous ways on the count of chapters, verses, words, letters and in their correlations to the content of the verses. Also,

MOTIVATION

- ✘ A reader can find numerous examples of the mathematical structure exhibition in so many ways in Quran that is elaborated in Appendices 1 and 2 of the book specifically and referred to in other appendices and footnotes as well.
- ✘ As I started this work and calculation, many people were skeptical about the result of the work expressing that talking about future prophecies must be expressed by a messenger and since you are not a messenger (I am NOT A Messenger), this work is a transgression of the limits and shall not be continued!?
- ✘ As you can see in the following pages by analyzing the work of Rashad in this regard, he did not extend his work to the detail of days and hours of the events as Quran is constantly refereeing to the Day Of Resurrection!?
- ✘ The format of the calendar dates data was not known during his lifetime, and they could not be weighted and compared.

MOTIVATION

- ✖ Since I started in 2015 to express my ideas using power-point, I will continue using the same format to utilize the same original presentations format and add more pages and bullet points as may be new questions arises as this work is being evaluated and commented on.

MESSENGER'S DUTIES

1. Unveil and proclaim the Quran's mathematical miracle (Appendix 1).
2. Expose and remove the two false verses 9:128-129 from the Quran (App. 24).
3. Explain the purpose of our lives; why we are here (Appendix 7).
4. Proclaim one religion for all the people, and point out and purge away all the corruptions afflicting Judaism, Christianity, and Islam (Appendices 13, 15, 19).
5. Proclaim that Zakat (obligatory charity) is a prerequisite for redemption (7:156), and explain the correct method of observing Zakat (Appendix 15).
- 6. Unveil the end of the world (Appendix 25).**
7. Proclaim that those who die before the age of 40 go to Heaven (Appendix 32).
8. Explain Jesus' death (Appendix 22).
9. Explain the Quran's delivery to, then through Muhammad (Appendix 28).
10. Announce that Muhammad wrote God's revelations (the Quran) with his own hand (Appendix 28).
11. Explain why most believers in God do not make it to Heaven (Appendix 27).
12. Proclaim that God never ordered Abraham to kill his son (Appendix 9).
13. Proclaim the secret of perfect happiness (Introduction, xx).
14. Establish a criminal justice system (Appendix 37).

HIGHLIGHTS OF APPENDIX 25

(God is) the Knower of the future;
He does not permit anyone to unveil such knowledge.
Only through the messengers that He chooses
does He reveal future and past events. [72:27]

Among the duties charged to me as God's Messenger of the Covenant is unveiling the end of the world (Page 415). We learn from 18:7-8 and 69:13-15 that this world will come to an end. A new earth and new heavens will replace the present heavens and earth (14:48).

Signs of the Approaching End of the World

The Quran provides many signs, and states that the means for unveiling the end of the world have been given (47:18). The signs given in the Quran include:

1. The splitting of the moon: This already happened in June 1969 when we landed on the moon and brought back moon rocks. People on earth can go now to many museums, colleges and observatories to look at pieces of the moon.

2. Discovering the Quran's 19-based mathematical code (74:30-37): Fulfilled in 1969-1974.

HIGHLIGHTS OF APPENDIX 25

3. The creature (27:82): “Made from the earth, it alerts the people that they have been oblivious to their Creator.” The Creature, made from the earth, did appear and was instrumental in unveiling the Quran’s numerical code, and proclaiming that the world has neglected God’s message; *the creature is the computer*. Note that the digits that make up 27:82 add up to 19.

4. Appearance of God’s Messenger of the Covenant (3:81): As detailed in Appendix 2, a consolidating messenger, prophesied in the Quran, comes after all the prophets have delivered the scriptures, to purify and unify. This prophecy was fulfilled in Ramadan 1408.

5. The Smoke (44:10): occurs after God’s Messenger of the Covenant has delivered the unified message and proclaimed Submission (Islam) as the only religion acceptable by God.

6. Gog and Magog: they re-appear, in accordance with God’s plan, in the year 1700 AH (2271 AD). Gog and Magog are mentioned in 18:94 and 21:96. If you count the verses from 18:94 to the end of Sura 18, you find them 17. If you count the verses from 21:96 to the end of Sura 21, you find them also 17. This is the Quran’s sign that Gog and Magog will re-appear in 1700 AH.

HIGHLIGHTS OF APPENDIX 25

It Will Not Remain Hidden [20:15]

Verse 15 of Sura 20 informs us that the end of the world will be revealed by God before the end of the world, and Sura 15, Verse 87, gives the time for that event:

We have given you the seven pairs, and the great Quran. [15:87]

The seven pairs are the 14 Quranic Initials. The total gematrical value of these profound pillars of the Quran's miracle pinpoints the year of the end of the world. It is noteworthy that Verse 85 of Sura 15 states: "The end of the world will surely come to pass." The next verse, 15:86, tells us that God is the Creator of this world, and, of course, He knows when it will end. The following verse, 15:87, tells us when the world will end. As shown in Table 1, the gematrical values of "The Seven Pairs" of Quranic Initials total 1709 (see also Table 1 of Appendix 1). According to 15:87, the world will survive for 1709 lunar years from the time this prophecy is stated in the Quran. This means that the world will end in the year 1710 AH. This number is a multiple of 19; $1710 = 19 \times 90$.

The unveiling of this information took place in the year 1400 AH, 309 years before the prophesied end of the world ($1709 - 1400 = 309$). The number 309 is a Quranic number (18:25), and is connected with the end of the world (18:21). The peculiar way of writing 309 in 18:25, "Three hundred years, increased by nine," indicates that the 309 are lunar years. The difference between 300 solar years and 300 lunar years is 9 years.

HIGHLIGHTS OF APPENDIX 25

Table 1: Total Gematrical Value of “The Seven Pairs” of Quranic Initials

<u>Quranic Initial</u>	<u>Gematrical Value</u>
1. Q	100
2. N	50
3. S (Saad)	90
4. H.M.	48
5. Y.S.	70
6. T.H.	14
7. T.S.	69
8. A.L.M.	71
9. A.L.R.	231
10. T.S.M.	109
11. ‘A.S.Q.	230
12. A.L.M.S.	161
13. A.L.M.R.	271
14. K.H.Y. ‘A.S.	<u>195</u>

Adding up all these numbers results to 1709

Subtracting 309 (see 18:24) from 1709 bring you to the year 1400 Lunar (the year of the discovery) that Rashad was working on this subject (A hint). This Lunar year is equal to 1980 Solar and adding 300 to this Solar year results in 2280, the year of the Resurrection.

Setting these numbers side by side according to the table, generates a number that is a multiple of 19 as well! (35 digits)

100 50....271 195 =19*528...905

HIGHLIGHTS OF APPENDIX 25

- ✧ The year of this discovery, 1400 AH, coincided with 1980 AD, and 1980 plus 300 solar years is 2280, also a multiple of 19, 19×120 . Thus the world ends in 1710 AH, 19×90 , which coincides with 2280 AD, 19×120 . For the disbelievers who do not accept these powerful Quranic proofs, the end of the world will come suddenly (6:31, 44, 47; 7:95, 187; 12:107; 21:40; 22:55; 26:202; 29:53; 39:55; 43:66; and 47:18).
- ✧ While *Hadith* is forbidden as a source of religious teachings (Appendix 19), it can be a useful source of history. We can derive a lot of information about historical events and local customs and traditions during the early centuries of Islam. The books of Hadith indicate that the Quranic Initials were believed to determine the life span of the Muslim *Ummah*. The classic exegesis by Al-Baydaawy cites the following historical event as a possible explanation of the Quranic Initials. The same event is detailed in Al-Suyooty's *ITQAAN*, First Printing, 1318 AH, Vol 2, Page 10:

HIGHLIGHTS OF APPENDIX 25

- ✘ **The Jews of Medina went to the Prophet and said, “Your Quran is initialed with A.L.M., and these Initials determine the life span of your religion. Since ‘A’ is 1, ‘L’ is 30, and ‘M’ is 40, this means that your religion will survive only 71 years.” Muhammad said, “We also have A.L.M.S.” They said, “The ‘A’ is 1, the ‘L’ is 30, the ‘M’ is 40, and the ‘S’ is 90. This adds up to 161. Do you have anything else?” The Prophet said, “Yes, A.L.M.R.” They said, “This is longer and heavier; the ‘A’ is 1, ‘L’ is 30, ‘M’ is 40, and ‘R’ is 200, making the total 271.” They finally gave up, saying, “We do not know how many of these Initials he was given!” [Al-Suyuty’s Famous Reference *ITQAAM*]**
- ✘ **Although this narration is well known, many scholars have been reluctant to accept the unmistakable connection between the Quranic Initials and the end of the world. They could not bring themselves to deal with this subject for the simple reason that the calculation makes the end of the world, and judgment, a reality.**

HOW DOES QURAN REFER TO THE LAST DAY?

- ✖ [38:53] This is what you have deserved on **the Day of Reckoning**.
- ✖ [38:78] "You have incurred My condemnation until **the Day of Judgment**."
- ✖ [38:79] He said, "My Lord, respite me till **the Day of Resurrection**."
- ✖ [40:15] Possessor of the highest ranks, and Ruler of the whole dominion. He sends inspiration, bearing His commands, to whomever He chooses from among His servants, to warn about the **Day of Summoning**.
- ✖ [50:20] The horn is blown; **this is the promised day**.
- ✖ [40:18] Warn them about **the imminent day**, when the hearts will be terrified, and many will be remorseful. The transgressors will have no friend nor an intercessor to be obeyed.
- ✖ [44:40] **The Day of Decision** awaits them all.
- ✖ [4:38] They give money to charity only to show off, while disbelieving in GOD and **the Last Day**. If one's companion is the devil, that is the worst companion.
- ✖ [19:39] Warn them about **the day of remorse**, when judgment will be issued. They are totally oblivious; they do not believe.

HOW DOES QURAN REFER TO THE LAST DAY?

- ✖ [6:31] Losers indeed are those who disbelieve in meeting GOD, **until the Hour comes to them suddenly** then say, "We deeply regret wasting our lives in this world." They will carry loads of their sins on their backs; what a miserable load!
- ✖ [6:40] Say, "What if GOD's retribution came to you, **or the Hour came to you:** would you implore other than GOD, if you are truthful?"
- ✖ [12:107] Have they guaranteed that an overwhelming retribution from GOD will not strike them, **or the Hour will not come to them suddenly**, when they least expect it?
- ✖ [16:77] To GOD belongs the future of the heavens and the earth. As far as He is concerned, **the end of the world (the Hour) is a blink of an eye away**, or even closer. GOD is Omnipotent.
- ✖ [18:36] "Moreover, I think this is it; **I do not think that the Hour (the Hereafter) will ever come to pass**. Even if I am returned to my Lord, I will (be clever enough to) possess an even better one over there."
- ✖ [42:17] GOD is the One who sent down the scripture, to deliver the truth and the law. For all that you know, **the Hour (Day of Judgment)** may be very close.
- ✖ [34:30] Say, **"You have a specific time, on a specific day, that you cannot delay by one hour, nor advance."**

HOW DOES QURAN REFER TO THE LAST DAY?

- ✖ As we could see in the last two slides the reference to the Hereafter and the day of Judgement is always **(with no exception)** uses the Day of the Resurrection or the Hour of Reconning or both.
- ✖ As you can verify no place in Quran God refers to the Hereafter with the MONTH OF THE RESURECTION, WEEK OF THE JUDDGEMENT or THE YEAR OF THE HEREAFTER!
- ✖ Quran never says to be mindful of the week, month or the year of the Resurrection! While the day of last day and hour is always used in this matter.

HOW DOES QURAN REFER TO THE LAST DAY?

- ✖ Now the question is why the Messenger of the Covenant stopped the calculations to identify the Day of resurrection or the Hour of the last Day as Quran is referring to this exceptional event all over the Quran!?
- ✖ Why there was no attempt by the messenger to calculate or mention of the Day of Resurrection in a more precise manner after identifying the year of the Resurrection in Lunar and Solar years in some peculiar way.
- ✖ All this while he himself is the one who translated the Quran to English with the wordings that we study today.
- ✖ (He was obviously aware of the Quran referring to the Hour and Day of the Resurrection while he only mentioned the year!)

HOW DOES THE MESSENGER REFER TO THE LAST DAY?

- ✖ Messenger ends his work in this subject with the following statement:
- ✖ The year of this discovery, 1400 AH, coincided with 1980 AD, and 1980 plus 300 solar years is 2280, also a multiple of 19, 19×120 . Thus the world ends in 1710 AH, 19×90 , which coincides with 2280 AD, 19×120 . For the disbelievers who do not accept these powerful Quranic proofs, the end of the world will come suddenly (6:31, 44, 47; 7:95, 187; 12:107; 21:40; 22:55; 26:202; 29:53; 39:55; 43:66; and 47:18).

HOW SUCH DIFFERENCES CAN BE EXPLAINED.

- ✖ My strong understanding is that the necessary knowledge to work with the element of DATE information data was not available during the lifetime of the messenger to precisely identify the dates of the remaining prophecies mentioned in the Quran including the Day of Resurrection.
- ✖ The software technology and internet communication were needed to build and improve software packages that work specifically with the element of DATE data to compare and evaluate the overlap of Lunar and Solar DATE information.
- ✖ A consistent format for the DATE data was not known at the time of the messenger on how to arrange this data elements.
- ✖ In what format we shall arrange the day, month and year in an element of DATE data to compare that with another Date data element?
- ✖ All this was answered by Almighty God at the date He decided to end His messenger's interim on earth (January 31, 1990)

HOW QURAN SUPPORTS THE MESSENGER OF THE COVENANT

- ✖ The date of the messenger's passing shall be only arranged in the form of Day (2 Digits), Month (2 Digits) and Year (4 Digits) in that specific order to generate a DATE data information divisible by the number 19.
- ✖ **DD MM YYYY 31 01 1990 = 19 * 1230 * 1327**
- ✖ All other combinations of DATE data does not create a divisible number for that matter. (This is how the format of the DATE data element is established)
- ✖ The date of the messenger's passing is not only divisible by the number 19, it is also divisible by the number 1230 that is the gematrical equivalence to the name Rashad = 505 + Khalifa = 725 (505 + 725 = 1230).
- ✖ This number of 1230 is also points to the first verse of the sura 19 of the Quran if you only count the verses in initiated chapters from the beginning of the Quran!

HOW QURAN SUPPORTS THE MESSENGER OF THE COVENANT

- ✖ There are 3 different ways that are being used in referring to the name of the messenger of the covenant:
- ✖ His first name and last name side by side Rashad Khalifa and
Gem = 505 725
- ✖ His first name and last name combined Rashad Khalifa and
Gem = 1230
- ✖ By his first name only just like the other messengers that Quran refers to them by their first name, Rashad and
Gem = 505
- ✖ And the following arrangement of the 3 referrals to his name in order of complexity are as follows:
- ✖ 505 725 1230 505 = 19*266...395

HOW QURAN SUPPORTS THE MESSENGER OF THE COVENANT

- ✖ The first verse of chapter 19 has the greatest number of initials (5) in one verse in Quran: **[19:1] K. H. Y. 'A. S.* (Kāf Hā Yā 'Ayn Sād)**
- ✖ The count of these letters in chapter 19 are as follows:
- ✖ (Kāf = 137, Hā = 175, Yā = 343, 'Ayn = 117, Sād = 26)
- ✖ The sum of all these numbers is = $798 = 19 * 42$
- ✖ And the number $19\ 798 = 19 * 1042$ is the number of days that the messenger of the covenant lived on this planet earth from his birth date on November 19, 1935, to the date of his passing on January 31, 1990!!
- ✖ *[6:2] He is the One who created you from mud, then predetermined your life span, a life span that is known only to Him. Yet, you continue to doubt.*
- ✖ The other number in Quotient is 1327 and this number points to the last verse of the sura 19 of the Quran if you only count the verses in initiated chapters from the beginning of the Quran!

HOW QURAN SUPPORTS THE MESSENGER OF THE COVENANT

- ✖ By the way, the count of the letters in Rashad's name in chapter 19 are as follows: R= 167, Sh=35, A=688, D=98.
- ✖ **The sum of all these numbers is 988 = 19*52!! For Rashad**
- ✖ The count of the letters in Khalifa in chapter 19 are as follows: Kh= 31, L=385, Y=342, F=75, H=174.
- ✖ **The sum of all these numbers is 1007 = 19*53!! For Khalifa**
- ✖ Pay attention to the fact that the count for the first name and the last name are in the correct order as well!!
- ✖ The above information creates an undisputable correlation between the date of the messenger's passing, his first and last name, his interim on earth, the major part of his research on the Quran initials. (This is how God the Author of Quran supports His messenger)

MIRACLE OF 19

- ✖ [74:30] Over it is nineteen.*
- ✖ In this verse and several verses after that God Almighty elaborates on the reason and importance of this miracle in authenticating the word of Quran as being Authored by God.
- ✖ The miracle in Quran is a venue for us humans to reassure ourself of the authenticity of the Quran by a simple mathematical tool that we can understand and trust.
- ✖ This fact includes the events and prophecies mentioned in the Quran such as the Day of Resurrection, Split of The Moon and so on.
- ✖ Working on such subjects requires to work with DATE data elements and having a solid format of that data is essential.
- ✖ Some of that knowledge has been used by the messenger while the most important of those mythologies were not known to him.

HOW THE DATE DATA ELEMENTS ARE UTILIZED.

- ✖ There are 3 methodologies to work with the element of DATE to compare and/or categories one DATE information with another, the following is the first approach:
- ✖ **1- D+D, M+M, Y+Y+Y+Y would that be generating a multiple of 19**
 - + The above is being denoted by this sign [+]
 - + For instance, 31 01 1990 [+] = 24. It always generates a 2 digits number and for that matter has a 2-point value if it is a multiple of 19.
 - + As an example, the above approach utilized by the messenger to prove a point in an understanding of the verse 82 of chapter 27. See the following:
- ✖ **The creature (27:82):** “Made from the earth, it alerts the people that they have been oblivious to their Creator.” The Creature, made from the earth, did appear and was instrumental in unveiling the Quran’s numerical code, and proclaiming that the world has neglected God’s message; the creature is the computer. **Note that the digits that make up 27:82 add up to 19.**

HOW THE DATE DATA ELEMENTS ARE UTILIZED.

- ✖ There are 3 methodologies to work with the element of DATE to compare and categories one DATE information with another, the following is the second approach:
- ✖ **2- DD + MM + YYYY would that be generating a multiple of 19**
 - + For instance, 31 + 01 + 1990 = 2022.
 - + It always generates a 4 digits number and for that matter has a 4-point value if it is a multiple of 19.

As an example, for the above approach utilized by the messenger to prove a point see the following: (This is at the end of the introduction to the book)

- ✖ *Rashad Khalifa*
Tucson
*Ramadan 26, 1409**

$$9+26+1409 = 1444 = 19*19*4$$

**The final draft of the first printing was completed in the Night of Destiny 1409. If we add the day, month, and year of this date, we get 1444, or 19x19x4. [Ramadan 26, 1409: 9+26+1409= 1444.]*

HOW THE DATE DATA ELEMENTS ARE UTILIZED.

- ✘ There are 3 methodologies to work with the element of DATE to compare and categories one DATE information with another, the following is the third approach: (Concatenation)
- ✘ **3- DD | | MM | | YYYY would that be generating a multiple of 19**
 - + For instance, 31 01 1990 = 19 * 1230 * 1327
 - + It always generates an 8 digits number and for that matter has an 8-point value if it is a multiple of 19 combination.
 - + This third approach has a very strong contribution in evaluating and categorizing the element of DATE information.
 - + This format of DATE element never used by the messenger of the covenant or anyone else to support a concept until after his passing date of January 31, 1990, and the above discovery.
 - + As an example, for the above approach utilized after the passing of the messenger to prove a point see the following:

HOW TO PROVE THAT “SPLIT OF THE MOON” WAS CONTROLLED BY GOD.

✕ **[54:1] The Hour has come closer, and the moon has split.***

[54:2] Then they saw a miracle; but they turned away and said, "Old magic."

[54:3] They disbelieved, followed their opinions, and adhered to their old traditions.

[54:4] Sufficient warnings have been delivered to alert them.

[54:5] Great wisdom; but all the warnings have been in vain.

[54:6] Ignore them; the day will come when the caller will announce a terrible disaster.

*54:1 This important sign of the approaching end of the world came to pass in 1969 when humans landed on the moon and brought pieces of the moon to earth. At the same time, God's mathematical Miracle of the Quran was being gradually unveiled. Traditional Muslims opposed it, since it exposed the fallacy of their practices (App. 25).

HOW TO PROVE THAT “SPLIT OF THE MOON” WAS CONTROLLED BY GOD.

- ✖ As we can see in the last slide footnote for the first verse of chapter 54 (Moon), messenger of the covenant talks about the Apolo 11 trip to the moon and split of the moon as a sign of approaching the end of the time:
- ✖ **1. The splitting of the moon:** This already happened in June 1969 when we landed on the moon and brought back moon rocks. People on earth can go now to many museums, colleges and observatories to look at pieces of the moon.
- ✖ The month of **June** mentioned above should be **July**.
- ✖ And the following DDMMYYYY for the date of the Moon split is generating a number that is multiple of 19 as a sign from God Almighty for the support of the concept mentioned by the messenger.
- ✖ $21\ 07\ 1969 = 19 * 1109051$

CONCLUSION:

- ✖ As we have witnessed in this presentation, the work of identifying the Day of Resurrection has gone to the extend of identifying the year by the messenger and not to the precision of the Day and the Hour of the Resurrection as Quran is always referring to it with no exception.
- ✖ Lack of computer software applications dealing with DATE data elements were identified as one of the reasons.
- ✖ Not having a concise format for DATE data elements that complies with the miracle of Quran was also recognized as another reason.
- ✖ This missing information and lack of progress on this front was resolved by the date that God Almighty choose to end His messenger's interim on earth. Also, teaches us the correct format and order of the DATE data elements.
- ✖ *That is why expanding on the work of the Messenger of the Covenant on this front, and other subjects is not stepping on his toes or transgressing the limits of Quran's teachings while is an obviously natural and expected course of work for future research on mathematically related (Miracle of 19) Quranic matters.*
