

Motivation:

The following is an attempt to present my take on prophecies mentioned in Quran, the Final Testament.

This work is totally based on the work of Dr. Rashad Khalifa and his excellent translation of the Quran into the English language.

You can find a copy of his translation on Amazon book library under this reference: “Quran The Final Testament, Authorized English Version”.

The work of Rashad Khalifa’s effort resulted in calculating the year of Return of the Gog&Magaog (2270/2271 AD & 1700 AH, for the detail of his work see Appendix 25 of the book referenced above and related footnotes on chapter 18 and 21).

Motivation

- This effort here started on 2015 as an extrapolation to the work of Rashad Khalifa and was intended to pinpoint the most probable days and hours of the prophetic events mentioned in the Quran.
- Everything that you see in this document is all based on my understanding of Dr. Rashad's work on this subject and my take on the Quran revelations about Prophecies mentioned in the book.
- This is an ongoing research on the prophecies subject according to the current available information and can be modified for the better in the future.

Motivation

- This is a quest to inform and warn the current and future generations of human race of the upcoming prophecies including the day of Resurrection before that day come to pass without people being aware and ready for that day as Quran is reminding all the people in its revelations.
- It is recommended that you get acquainted with the Quran revelations via the Rashad's translation of the book and its appendices.
- Understanding that Quran is intertwined with a mathematical structure based on the common denominator of number 19 (discovered in 1974 AD and referred to in chapter 74 verses 30 to 35).
- The above discovery has been verified in numerus ways on the count of chapters, verses, words, letters and in their correlations to the content of the verses. Also,

Motivation

- A reader can find numerous examples of the mathematical structure exhibition in so many ways in Quran that is elaborated in Appendices 1 and 2 of the book specifically and referred to in other appendices and footnotes as well.
- As I started this work and calculation, many people were skeptical about the result of the work expressing that talking about future prophecies must be expressed by a messenger and since you are not a messenger, this work is a transgression of the limits and shall not be continued!?
- As you can see in the following pages by analyzing the work of Rashad in this regard, he did not extend his work to the detail of days and hours of the events as Quran is constantly refereeing to!?
- The format of the calendar dates data was not known during his lifetime, and they could not be weighted and compared.

Motivation

- Since I started in 2015 to express my ideas using power-point, I will continue using the same format to utilize the same original presentations format and add more pages and bullet points as may be new questions arises as this work is being evaluated and commented on.
- The following is an attempt to support the result of the calculations for the details of the event of Return of the God&Magaog and the end of their conquest according to the verses of the Quran.

The End of the World*

[21:96] Not until Gog and Magog reappear,* will they then return--they will come from every direction.

[21:97] That is when the inevitable prophecy will come to pass, and the disbelievers will stare in horror: "Woe to us; we have been oblivious. Indeed, we have been wicked."
